AARADHANA VENKATESAN

Behavioural Science MSc | Research, Strategy & Product
United Kingdom | aaradhana.vn@gmail.com | +44 7438922363 | Website | linkedin.com/in/aaradhana-venkatesan/

I work at the point where human behaviour, technology and strategy meet. Over four years at an early-stage neurotechnology startup, I moved between research, product design, customer experience and business strategy, usually around questions that did not have an obvious owner or answer. I have researched users and markets, challenged product assumptions, translated complex technical information into human terms, and turned messy qualitative and quantitative signals into decisions.

CORE SKILLS:

Behavioural Research

- Qualitative & quantitative research
- Behavioural experiment design
- User interviews
- Survey design
- Insight synthesis
- Data analysis
- Physiology data mapping

Strategy & Innovation

- Problem framing
- Product discovery
- Segmentation
- Customer research
- Value propositions
- Opportunity identification
- Product strategy
- Strategic storytelling
- Customer Journey Design

Communication & Execution

- Research storytelling
- Visual reporting
- Presentations & decks
- Customer journeys
- Stakeholder communication
- Cross-functional strategy
- Process and workflow design
- Rapid prototyping

Tools

- CRM and Knowledge Management Systems
- R & Python
- Figma, Canva, Adobe
- Wix, Framer
- Airtable, Notion, Excel
- Google Workspace, Microsoft365
- ATS and recruitment systems

EDUCATION

MSc Behavioural Science - University of Glasgow, UK **Sep 2025 – Sep 2026**

- Dissertation: Investigating how AI source attribution influences trust and reliance on health recommendations through a controlled behavioural experiment.
- Relevant study: behavioural economics, experimental design, neuroscience, health neuroscience, reproducible research, quantitative research methods
- Area of interests: technology-mediated decision-making · behavioural change · AI and human judgement · health technology

B.Tech Biotechnology (Minor: Entrepreneurship) - SASTRA University, IN **Jun 2017 – Jun 2021**

PROFESSIONAL EXPERIENCE

Neurostellar (Chennai, IN) - Startup Generalist **Jan 2022 – Aug 2025**

Intern → Specialist Business Ops → Project & Business Generalist → CX & Behavioural Insights Lead

Product Strategy & User Experience

- Conducted user interviews, beta testing and behavioural research to understand adoption barriers, user needs and opportunities for product improvement
- Investigated elite performers as a potential customer segment, speaking with athletes, coaches, researchers and other stakeholders to understand unmet needs, evaluate the usefulness of physiological data and identify product opportunities.
- Contributed to product strategy through customer research, competitor analysis, persona development, value proposition refinement, pricing discussions, and feature prioritisation.
- Synthesised qualitative feedback and customer data into actionable insights for Product, Design and Engineering teams, informing onboarding, communication and user experience decisions.
- Owned UX design and industrial design processes to translate user needs into product improvements, resolve blockers, and maintain execution momentum while prioritising aesthetics and brand language.

Customer Experience & Service Design

- Designed and supported customer onboarding journeys and cohort experiences for early users of a wearable health technology product.

- Developed customer education materials, product documentation and feedback processes that made complex technical information more accessible to users. Worked directly with customers to identify pain points, communicate solutions and improve product adoption and engagement.
- Built internal FAQs and knowledge systems to connect customer feedback with product and operational teams.

Strategic & Commercial Projects

- Partnered with founders on strategic initiatives spanning grants, partnerships, market development, compliance and business planning.
- Developed website content, social media campaigns, promotional videos, partner materials and presentations to communicate technical products and business opportunities to customers, collaborators and external stakeholders.
- Supported international market development through Neurostellar's participation at CES 2025 and GITEX Global 2024, including product demonstrations, stakeholder engagement and exhibition experience.
- Translated technical progress, product milestones and company strategy into pitch decks, presentations and external communications.
- Supported IP documentation, legal coordination, and regulatory research related to product development.

Building Systems for Growth

- Identified fragmented workflows across recruitment, customer experience, product information, and internal operations, creating clearer systems to improve collaboration.
- Designed CRM, ATS, onboarding, and documentation workflows to reduce manual effort and create repeatable processes as the team grew.
- Built internal knowledge systems, FAQs, and product documentation to make complex technical information accessible across teams.
- Connected customer, operational, and product information flows to improve visibility and support better decision-making.

OTHER EXPERIENCE

Welcome Team – Student Services, University of Glasgow, (Glasgow, UK) — Feb 2026 – Present
Safety Steward - G4S Events, (Glasgow, UK) — Feb 2026 – Present
Festive Staff - Scotsman Hospitality, The Grosvenor Café (Glasgow, UK) — Dec 2025 – Jan 2026

VOLUNTEERING & COMMUNITY

Student Wellbeing & Inclusion Ambassador, University of Glasgow — Jan 2026 – Present
Welfare Officer, Glasgow University Tamil Society — Oct 2025 – Present
Eco-Hub Sustainability Volunteer, University of Glasgow — Nov 2025 – Present
Res-Life Event Volunteer, University of Glasgow — Oct 2025 – Present

PROFESSIONAL DEVELOPMENT

Adam Smith Skills Award Plus Level — Jun 2026
UofG Volunteering Awards – Gold (100 + Hours of Volunteering) — May 2026

WRITING & COMMUNICATION

Aara's Archive – Substack — **Mar 2026 – Present**

- Write and synthesise research-driven articles exploring behavioural science, health technology, AI, and innovation for a general audience. https://aaradhanavenkatesan.substack.com/

CONFERENCES

Building Capability in Behavioural Research (BCBR), Birmingham — **Jun 2026**

- Behavioural research across AI/digital, health and wellbeing, and sustainability at BCBR 2026 hosted by BR-UK and Centre-UB.

CES 2025 (Consumer Electronics Show), Las Vegas — **Jan 2025**

- Orchestrated comprehensive booth design, marketing materials, and experience design for Neurostellar's exhibition at CES 2025, ensuring cohesive brand messaging within the high-traffic Eureka Park pavilion

GITEX Global 2024, Dubai — **Oct 2024**

- Represented Neurostellar and the state IT ministry's startup portfolio at GITEX Global 2025 by managing full-cycle exhibit coordination and delivering live product demonstrations to international industry stakeholders
